District Mission Statement

We are dedicated to providing all of our children with an education of the highest caliber. Our future rests in the hands of today's children. Education is the key to improving the quality of their lives. In order to accomplish this mission:

• We are committed to knowing each child as an individual and providing that child with the skills, attitudes, concepts and knowledge needed to be a complete person.

• We support responsible citizenship by reinforcing morals and values.

• We recognize and celebrate our diversity.

• We support a staff committed to learning and growing.

• We will build a sense of school community through effective communications.

• We will provide strong leadership, a safe environment, clear goals, high expectations and continuous assessment.

We share our successes and grow from our experiences.

District Administration

Dr. Maria L. Rianna, Superintendent
Dr. Michael Israel, Assistant Superintendent for Curriculum, Instruction and Technology
Victoria Galante, Assistant Superintendent for Business
The original RtI committee will continue to review and adjust this district wide plan on an annual basis in order to:

- *Evaluate* accomplishments of staff development plan to determine next steps
- *Measure* effectiveness of tiered instruction based upon gathered data
- *Determine* whether assessments are best matched to our student population
- *Review* current instructional programs and activities and relevant assessments
Academic Intervention Services

Academic Intervention Services are provided to students recommended by classroom teachers who are at risk of not achieving the State Learning Standards. A variety of assessment criteria is considered including State-designated student performance levels (scale scores) on State assessments in grades 3-8.

These services include additional instruction that supplements the general curriculum. Students in grades 3-8 are scheduled for Academic Intervention Services during the school day. Middle School students are scheduled for Academic Intervention Services through AIS Lab periods. AIS is provided at the High School using a push-in model in core academic subjects. Additionally, High School students have the opportunity to participate in additional instruction during teacher’s office hours.

Summer School is offered to identify students entering grades 6-9 through the Summer of Success, which is taught through an interdisciplinary model focusing on the core curriculum as well as organizational and study skills. Students in grades 9-12 have an opportunity to participate in the Regional Summer School program offered through BOCES for core academic subjects.

The Twilight Program is offered to students who are interested in pursuing the TASC High School Equivalency requirements.

The focus of Academic Intervention Services is providing support in meeting NYS Learning Standards within the Common Core, additional learning opportunities to strengthen basic skills in core content areas in order to improve student performance on State assessments and to provide a risk free environment for students to reach and exceed their learning potential.

Response to Intervention

Response to Intervention (RtI) is a multi-step approach to providing high quality instructional intervention matched to student needs. This general education service begins with providing high quality research-based instruction in the classroom. Instruction is differentiated to match student need. School wide screening using the Renaissance Star and the Fountas & Pinnell Benchmark Assessment System serve to identify student needs in grades K-5. For students at risk, supplemental intervention is delivered using a multi-tiered format with increasing levels of intensity and targeted focus of instruction. Repeated assessments provide data for monitoring student progress and measuring the effectiveness of instructional strategies. Instructional data also applies to behavioral needs that impact learning.
**Introduction of Response to Intervention**

Response to Intervention, RtI, is primarily a general education initiative designed to address the needs of struggling learners early in their educational experience.

1. RtI begins with high quality research-based instruction in the general education setting provided by the general education teacher.

2. In an RtI process, a student who is struggling receives additional instructional support provided by matching instruction to a student’s individual needs through a 3-tiered instructional model. Each tier provides instruction with increased intensity such as smaller groups or instructional time focused on specific areas.

3. The focus is on targeted interventions directed to the need of the individual student rather than broad based instruction. Differentiated learning activities (e.g., mixed instructional grouping, use of learning centers, peer tutoring) are utilized to address individual needs.

4. Student intervention outcomes drive instructional decision making at every tier of the model. A systematic, data-based decision making (problem solving) method is used to decide not only what interventions to try, but whether the implemented strategies are working for the student.

5. RtI systems combine universal screening and high quality instruction for all students with interventions targeted at struggling students.

The New York State Education Department (NYSED) has established a regulatory policy framework for RtI in relation to school-wide screenings, minimum components of RtI programs, parent notification and use of RtI in the identification of students with learning disabilities. The Regents policy establishes RtI as a school-wide system of organizing instruction and support resources to deliver high quality instruction to meet the diverse needs of learners.

**The Four Essential Components of RtI are:**

- A school-wide, multi-level instructional and behavioral system for preventing academic failure
- Screening
- Progress Monitoring
- Data-based decision making for instruction, movement within the multi-level system, and disability identification (in accordance with state law)

**Goal of RtI:**

The goal of RtI is to assess students more appropriately and target the tiered interventions to identified needs before determining whether referral to the Committee on Special Education is necessary.
A Response to Intervention (RtI) Model

Tier III Interventions:
- Groups of 1-3 Students
- High intensity focused instruction on targeted areas
- Duration & intensity depends on individual student needs

Tier II Interventions:
- Groups of 3-5 students
- Focused instruction for at risk students
- Students progress monitored in targeted areas

Tier I Interventions:
- Whole group core instruction
- Differentiated Instruction
- Preventative/Proactive Actions

Tier 3
1-5%

Tier 2
5-10%

Tier 1
80-90%

Instruction for all students
Application of Student Information to Make Educational Decisions

A school district’s process to determine if a student responds to scientific, research-based instruction shall include the application of information about the student’s response to intervention to make educational decisions about changes in goals, instruction and/or services and the decisions to make a referral for special education programs and/or services.

[8NYCRR§100.2(ii)(1)(v)]

Initial screening and progress monitoring data inform decisions about the level and type of interventions needed to help individual students make progress. Several models of interventions exist. They are:

- **Standard Protocol Model:**
  - Standard interventions will be put into place as determined by cut scores on District selected Curriculum Based Measures.

- **Problem-Solving Model:**
  1. Conceptualize the problem (Is there a problem? What is it?)
  2. Examine variables that may be influencing the problem (Why is it happening?)
  3. Deliver targeted or individualized interventions (What shall we do about it?)
  4. Evaluate the effectiveness of the intervention (Did the intervention work?)

- **Decision-Making Model Combined:**
  - Both a problem solving and a standard protocol will be used in the Glen Cove district. This combined model will result in students receiving the interventions most appropriate for their needs. The standard protocol will address larger numbers of students in order to identify those in need of a Tier II intervention. When indicated, the Problem Solving method will be used with Tier III students who need more specific interventions to address their individual needs.

Problem Solving Process

![Problem Solving Process Diagram]
IST Committee

The Instructional Support Team (IST) assists teachers in providing appropriate interventions for students who face challenges in the core curriculum. The IST committee offers instructional strategies and support that will be delivered through supplemental instructional approaches, differentiated and guided activities, and/or intensive research-based programs. IST members collaborate with the classroom teacher as they pinpoint the origin of the students’ difficulties with the core curriculum. The IST process is enhanced when IST members are able to acquire data and artifacts before the scheduled IST meeting. The IST committee should consist of the building principal, the school psychologist, social worker, speech language therapist, reading teacher, special education teacher, classroom teacher, and AIS teachers.

In order to initiate the IST process, the classroom teacher must submit the IST Referral Form with relevant data to the main office for scheduling.

The IST team should meet weekly.

The IST meeting will require the following:

- Completed IST Referral Form
- Submission of collected data points prior to the scheduled meeting
  - F&P scores
  - STAR Renaissance reports (i.e. Diagnostic, Growth, Instructional Planning Student)
  - Student artifacts
  - Informal assessments (i.e. Informal running record)
- A summary of research-based practices and approaches that have been provided during tiered instruction
- An explanation of intervention services implemented in the classroom
Critical Elements in a 3-Tier RtI Model

The following table outlines the essential features of a three-tier model of RtI including suggested ranges of frequency and duration of the screening, as well as interventions and progress monitoring.

<table>
<thead>
<tr>
<th>Elements</th>
<th>Tier 1 Core Curriculum and Instruction</th>
<th>Tier 2 Supplemental Instruction</th>
<th>Tier 3 Increased Levels of Supplemental Instruction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Size of instructional group</td>
<td>whole class grouping</td>
<td>small group instruction (3-6 students)</td>
<td>includes individualized or small group instruction (up to 4 students grades K-2, up to 5 students grades 3-5)</td>
</tr>
<tr>
<td>Determining Skill Achievement</td>
<td>relative to the cut points identified on curriculum based measures and/or continued growth as demonstrated by progress monitoring</td>
<td>relative to the cut points identified on the curriculum based measures and continued growth as demonstrated by progress monitoring</td>
<td>relative to the student’s level of performance and continued growth as demonstrated by progress monitoring</td>
</tr>
<tr>
<td>Frequency of progress monitoring</td>
<td>universal screening measures three times per year</td>
<td>varies, but no less than once every two weeks</td>
<td>varies, but more continuous and no less than once a week</td>
</tr>
<tr>
<td>Frequency of intervention provided</td>
<td>per school/class schedule</td>
<td>varies, but no less than three times per week for a minimum of 20-30 minutes per session</td>
<td>varies, but more frequently than Tier 2 for a minimum of 30 minutes per session</td>
</tr>
</tbody>
</table>
The following table outlines the essential features of a three-tier model of RtI throughout the Glen Cove City School District.

Tiers Explained K-5

Tier 1

Minimum of 60 minutes of math instruction that align with the appropriate grade level Next Generation Math Standards

- Research-based core curriculum
- Includes all students
- Universal screening 3 times yearly –STAR (can be used as screener & progress monitor)

Minimum 90 minutes of balanced literacy instruction in the areas of:
- Phonemic awareness
- Phonics
- Fluency
- Vocabulary
- Comprehension
- Writing

Core Instruction in the Classroom

- Students will receive appropriate instructional supports in the general education classroom in all content areas.
- Appropriate instruction in reading and writing includes scientific research-based reading programs that deliver explicit and systematic instruction in phonemic awareness, phonics, vocabulary development, reading fluency (including oral reading skills), reading comprehension strategies and writing skills and conventions.
- Flexible group instruction used to structure differentiated learning.

Assessment

- All students will participate in universal screening using STAR Renaissance.
- All students will be assessed three times a year and results will be used to determine if the students’ learning needs are being met through whole group classroom instruction and/or which students need more intensive targeted intervention.

Grade Equivalent scores range from 0.0 to 12.9+. They represent how a student's test performance compares with that of other students nationally. For example, if a 5th-grade student has a GE of 7.6, his or her score is equal to that of a typical 7th grader after the sixth month of the school year. This score does not necessarily mean that the student is capable of reading or doing mathematical computations on 7th-grade material. It only indicates that the student's reading skills are well above average for his or her grade level.

- Score will identify students who will receive either Tier II or Tier III interventions.
- Students who continue to struggle after receiving targeted differentiated instruction can be referred to the IST/RtI teams for further recommendations for learning supports in or out of the classroom.
Tier 2

- Includes individualized, target supports for students with more significant academic concerns.
- Students receiving Tier II intervention would be best served by supplemental instructional interventions in a small group (3-6 students), 3-5 days a week.

<table>
<thead>
<tr>
<th>Targeted Intervention</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tier II interventions shall be targeted interventions matched to students’ specific academic strengths and needs.</td>
</tr>
<tr>
<td>Interventions will target the five critical areas of reading (phonemic awareness, phonics, vocabulary development, reading fluency and reading comprehension strategies.) and writing</td>
</tr>
<tr>
<td>Tier II math interventions will target number sense, operations, algebraic thinking and other foundational math skills.</td>
</tr>
<tr>
<td>Tier II supplemental instructional supports will be delivered in small group format (3-6 students).</td>
</tr>
<tr>
<td>Intensity of services will be based on the level of student need as determined by multiple measures and assessing multiple data points.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Progress monitoring using STAR Renaissance as needed.</td>
</tr>
<tr>
<td>If the data gathered through progress monitoring indicates improvement of skill, the intervention will be maintained. Grade Equivalent scores range from 0.0 to 12.9+. They represent how a student's test performance compares with that of other students nationally. For example, if a 5th-grade student has a GE of 7.6, his or her score is equal to that of a typical 7th grader after the sixth month of the school year. This score does not necessarily mean that the student is capable of reading or doing mathematical computations on 7th-grade material. It only indicates that the student's reading skills are well above average for his or her grade level.</td>
</tr>
<tr>
<td>If the data gathered through progress monitoring indicates a lack of progress, the intervention will be altered by increasing frequency, time of sessions, or changing materials.</td>
</tr>
<tr>
<td>Meet with IST committee and teacher representatives to discuss research-based strategies and its effectiveness in promoting student growth and development. Evaluate the effectiveness of the program(s).</td>
</tr>
<tr>
<td>If the progress monitoring indicates achievement of the skill, the intervention will be discontinued. The student’s progress will be monitored to confirm that the skill is maintained.</td>
</tr>
</tbody>
</table>
Tier 2 Entrance and Exit Procedures

ENTRANCE PROCEDURES:

The student demonstrates the need for research-based interventions that supplement the core instruction. Data analysis suggests moderate-or-higher gaps between student performance and the benchmark set by the district and New York State. Students are entered into the appropriate intervention service through either of the following procedures:

- Students receive TIER 2 interventions based upon the observations of the classroom teacher. Observations focus on data pointing to the need of intensive services to help the student(s) meet the appropriate benchmarks set by the district and New York State.

- IST team has determined that the data suggests the student requires intervention services to meet the appropriate benchmarks set by the district and New York State. Decisions are determined by analyzing various data points. [It is recommended that a sufficient number of data points (a minimum number of 6 to 8) are collected and used to inform decisions.]

EXIT PROCEDURES:

Students are exited from the appropriate intervention services through the following procedures:

- IST committee has evaluated a collection of data points. The information suggests that the student is on pace to meet the appropriate benchmarks set by the district and New York State. Decisions are determined by analyzing various comparative data points. [It is recommended that a sufficient number of data points (a minimum number of 6 to 8) are collected and used to inform decisions.]

- Students exited from Tier 2 services will be monitored at least once a month through research-based progress monitoring protocols in conjunction with formal and informal assessments.

- If a student demonstrates consistent regression, he/she will be prescribed appropriate interventions.
### Tier 3

- Tier III intervention is designed for those students who demonstrate insufficient progress in Tier II.
- Tier III differs from Tier II instruction in terms of such factors as time, duration, group size, frequency of progress monitoring and focus.
- Tier III provides greater individualized instruction in a small group setting. Instructional programs will meet anywhere from 30-60 minutes.

<table>
<thead>
<tr>
<th>Intensive Intervention</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be determined to need Tier III interventions through the results of the progress monitoring or if the Tier II interventions were not successful in moving them forward.</td>
</tr>
<tr>
<td>Interventions will target the five critical areas of reading, phonemic awareness, phonics, vocabulary development, reading fluency and reading comprehension strategies.</td>
</tr>
<tr>
<td>Math interventions include the use of grade level benchmark assessments (see additional assessments below).</td>
</tr>
<tr>
<td>Tier III intensive services will include small group instructional practices and activities.</td>
</tr>
<tr>
<td><strong>K-2 LLI maximum 4 students</strong> (research-based, running records, increased % of students exiting, conferencing with every student during every lesson)</td>
</tr>
<tr>
<td><strong>3-5 LLI maximum 5 students</strong> (research-based, running records, increased % of students exiting, conferencing with every student during every lesson)</td>
</tr>
<tr>
<td><strong>K-5 AIS math maximum 6 students</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Progress monitoring using STAR Renaissance will occur every six weeks.</td>
</tr>
<tr>
<td>If the data gathered through progress monitoring indicates improvement of skill, the intervention will be maintained.</td>
</tr>
<tr>
<td><em>Grade Equivalent scores range from 0.0 to 12.9+. They represent how a student's test performance compares with that of other students nationally. For example, if a 5th-grade student has a GE of 7.6, his or her score is equal to that of a typical 7th grader after the sixth month of the school year. It only indicates that the student's reading skills are well above average for his or her grade level.</em></td>
</tr>
<tr>
<td>If the data gathered through progress monitoring indicates a lack of progress, the intervention will be altered by increasing frequency, time of sessions, or changing materials.</td>
</tr>
<tr>
<td>If the progress monitoring indicates that the student has achieved the criteria, the intervention will be decreased to Tier II level for skill maintenance.</td>
</tr>
<tr>
<td>If the Tier III interventions are ineffective, the RtI team will convene to carefully review the student’s intervention plan and sources of data to determine next steps. Tier III could include the development of other strategies or referrals for section 504 or special education evaluations.</td>
</tr>
</tbody>
</table>
Tier 3 Entrance and Exit Procedures

ENTRANCE PROCEDURES:

Students are entered into the appropriate intervention service through either of the following procedures:

- Students receive TIER 3 services based upon conversations with the building principal, AIS / reading teachers, and classroom teacher, resulting in a shared consensus that the student requires TIER 3 interventions in order to fully access the curriculum. Conversations focus on data that points to students requiring intensive services to meet the appropriate benchmarks set by the district and New York State.

  The committee’s deliberation will be recorded using Appendix K.

- IST committee has determined that the data suggests the student requires intensive services to meet the appropriate benchmarks set by the district and New York State. Decisions are determined by analyzing various data points. [It is recommended that a sufficient number of data points (a minimum number of 6 to 8) are collected and used to inform decisions.]

EXIT PROCEDURES:

Students are exited from the appropriate intervention services through the following procedures:

- IST committee has evaluated a collection of data points. The information suggests that the student is on pace to meet the appropriate benchmarks set by the district and New York State. Decisions are determined by analyzing various comparative data points. [It is recommended that a sufficient number of data points (a minimum number of 6 to 8) are collected and used to inform decisions.]

- Students exited from Tier 3 services will be monitored periodically through research-based progress monitoring protocols. The classroom teacher and Tier 3 provider will work in collaboration as they monitor the student’s progress.

- If a student demonstrates consistent regression, the student will be placed back into the appropriate intervention services.
Tier 1 Research-Based Instruction (Core Instruction)

I. Core instruction takes place in the general education classrooms and includes all students.

The components are:

1. Phonemic Awareness (K-2)
   - Refers to the specific ability to focus on and manipulate individual sounds, phonemes in spoken words
2. Phonics Instruction (K-2)
   - The ability to apply knowledge of letter-sound relationships, including knowledge of letter patterns to correctly pronounce written words
   - Explicit, systematic phonics instruction, shared reading, and direct instruction as part of Guided Reading and strategy groups
3. Vocabulary (K-5)
   - Refers to words we must understand to communicate effectively, when listening, speaking, reading and writing.
   - Explicit vocabulary building instruction across the content areas, including direct instruction in root words and affixes, structural analysis, inferring meaning based on context clues, genre studies, deductive and inductive categorization, semantic mapping, sketch to stretch, and degrees of word meaning (ex. little, small, tiny, minuscule, microscopic), and association (students make connections between and among known and unknown words.)
4. Fluency (K-5)
   - The ability to read with speed, accuracy, proper expression and intonation making reading smooth
   - Direct instruction in reading fluency: appropriate pace, prosody, and expression through choral reading, echo reading, partner reading, and repeated readings of poems, chants, songs (lyrics), and grade level texts; using recorded materials; scooping meaningful phrases; Readers’ Theater; oral presentations; Language Experience approach, reading own work (writing); and reading aloud. Additional word recognition instruction (for automaticity) and vocabulary instruction offered as needed to further enhance reading fluency.
5. Comprehension (K-5)
   - Understanding and interpreting what is read
   - Direct instruction in Guided Reading groups and shared reading experience emphasizing strategy instruction, mini-lessons/whole class instruction, think aloud, predicting, visualizing, self-monitoring, thinking about what makes sense, using meta cognition, summarizing, determining the relative importance of details and/or events, finding main ideas and details, story mapping, using graphic organizers, activating background knowledge, thinking about the author’s message and point of view, synthesizing, making connections (text to text, text to self), inferring, analyzing characters, and developing critical literacy.
6. Writing (K-5)
   - Students will collect, draft, revise, edit, and publish well-crafted narrative and expository texts.
II. Differentiation

1. Elements of differentiation
   ● Tailored instruction is used to meet individual needs.
   ● The teacher differentiates content, process, products, or the learning environment.
   ● The use of ongoing assessment and flexible grouping makes this a successful approach to
     instruction.

“When struggling readers routinely read from texts on their independent level they make the
      greatest reading gains” (Allington, “What Really Matters in Response to Intervention”)

III. Small group work in the general education classroom:

1. Implementation of small group work
   ● Classroom teachers provide small group instruction for struggling students (refer to above
     components.)
   ● Instruction may also include support from speech teachers, ENL teachers, reading teachers,
     teaching assistants.
   ● Small group size and frequency are determined by the needs of students.

IV. Universal Screening

1. Renaissance STAR
   ● A school district’s process to determine if a student responds to scientific research based
     instruction.
   ● Shall include screenings applied to all students in the class to identify those students who are
     not making academic progress at expected rates.

V. Fidelity to Testing Requirements

1. Adhere to assessment schedule
   ● Calendars indicating benchmark assessment windows will be distributed in September.
   ● Principals, lead teachers, and interventionists will support classroom teachers in adhering to
     the schedule. Classroom proctors will be involved in making sure that assessments are
     administered “with fidelity” both by new teachers and by veteran teachers over time.
   ● Turnkey trainers will instruct new teachers in how to administer assessments with fidelity to
     ensure valid results.
VI. Quality Indicators for Appropriate Tier 1 General Classroom Instruction

1. Effective research/evidence-based instruction for all students
   ● Scientific research-based reading instruction includes an uninterrupted block of 90 minutes (minimum) of daily explicit and systematic instruction in phonemic awareness, phonics, vocabulary development at all grade levels, reading fluency (including oral reading skills) reading comprehension strategies and writing skills.
   ● Scientific research-based math instruction includes an uninterrupted block of 60 minutes (minimum) instruction in problem-solving, arithmetic skill/fluency, conceptual knowledge/number sense and reasoning ability.
   ● Curriculum is aligned to the State learning standards and grade level performance indicators.
   ● Instruction is provided by qualified personnel and trained staff.
   ● Differentiated instruction is used to meet a wide range of student needs.
   ● Professional development is provided to ensure fidelity of implementation.
   ● Instructional strategies/programs are implemented with fidelity.
   ● Instruction is culturally and linguistically responsive to the language and learning needs of students whose first language is not English.

Source: New York State Education Department Guide to RtI
Tier 2 Research-Based Instructional Strategies and Resources

I. Characteristics:

- Supplemental instruction
- Tier 2 instruction is delivered in conjunction with Tier 1 instruction
- Addresses the specific needs and key areas for students
- Immediate corrective feedback
- Additional time to complete complex skills and strategies
- Additional opportunities to demonstrate mastery of content
- More opportunities to respond
- Setting goals and self-monitoring
- Build a trusting and supportive relationship with instructor

Tier 2 strategies include, but are not limited to, the following research-based suggestions:

I. Core Instructional Supports

1. Foundational (Phonemic Awareness; Phonics; Fluency; Vocabulary)
   - Magnetic letters
   - Corrective reading
   - Word supply
   - Sentence repeat
   - Error correction
   - Word attack drills (i.e. Break the word into parts, identifying familiar “sounds, use the context of the sentence to discover correct word pronunciation, etc.)
   - Phonics
     a) Model sound in isolation
     b) Students repeat the sound
     c) Spiral sound instruction
     d) Introduce new sounds
     e) Magnetic Letters or marker board
     f) Elkonin Boxes

2. Comprehension
   - Guided reading
   - Leveled reading (Help students move from simple to complex instruction)
   - Chunking text selections
   - Pre-teach vocabulary and context
   - Reteach in small group setting
   - Reteach skills in a step-by-step process
   - Roadmap activity
   - Extended reading activities
   - Independent reading activities
   - Prescriptive graphic organizers
   - Text to speech
   - Teach reading skills recursively (i.e. identify and track central idea)

II. Prescriptive Instructional Practices

1. Elements of prescriptive practices
   - Multi-sensory instruction
   - 1:1 reading conferences
   - Modification of assignments (i.e. fewer problems or questions)
• STAR Renaissance Instructional Planning Reports
• Students unpack and align work to rubrics
• 1:1 time for questions and answers (i.e. comprehension-based discussion)
• STAR Renaissance question and skill continuum suggestions

II. **Small Group Work**
   • Strategic grouping
   • Collaborative comprehension/foundational activities
   • Reteaching activities
   • Reteach skills in a step-by-step process

III. **Progress Monitoring**
   1. Monitor student’s response to Tier 2 instructional approaches
      • STAR Renaissance Progress Monitoring Assessment
      • Running record
         a) Fountas & Pinnel
         b) Informal Running Records
      • Informal assessments
      • Formative assessments

III. **Questioning Strategies:**
   1. Scaffolds or centralized
      • Skill-based questions
      • Leveled questions
# Suggested Foundational Strategies

<table>
<thead>
<tr>
<th>Learning Difficulty</th>
<th>Interventions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Limited sight vocabulary</td>
<td>- Teacher will present a series of four words in which three words are the same and one is different. Student will pick the one that is different and explain why.</td>
</tr>
<tr>
<td></td>
<td>- Students will find and circle words in context of poems, books and around the world.</td>
</tr>
<tr>
<td></td>
<td>- Students will circle the correct spelling from a list of words.</td>
</tr>
<tr>
<td></td>
<td>- Student will fill in the missing letter for words.</td>
</tr>
<tr>
<td></td>
<td>- Student will complete word searches.</td>
</tr>
<tr>
<td></td>
<td>- Students will sequence letters in the correct order to spell a word.</td>
</tr>
<tr>
<td></td>
<td>- Teacher will use kinesthetic movements to help review and retain sight words. For example: clap it out, dance it out, sing it out.</td>
</tr>
<tr>
<td></td>
<td>- Teacher will have students practice sight words in a tactile way: magnetic letters, sand, shaving cream, clay, dry-erase boards, letter tiles, clothes-pins with sentence strips.</td>
</tr>
</tbody>
</table>
- Teacher will use Roll and Write to build sight word vocabulary.

</tbody>
</table>
- Teacher will use look, say, cover, write check

- Teacher will create boxes for students to place the correct word wall in. Draw puzzle box down one side of the paper with a list of possible words down the other side. Students determine which word fits each puzzle box and will write each letter in the correct box.
Teacher will teach students various word wall chants.

- **Movie Star Kisses**
  Put your hands to your mouth. Through each letter in the word, blow a kiss like a movie star! Blow and say the whole word.

- **Hold Your Nose**
  Hold your nose and spell the word. Say the whole word with your nose closed and then say, “P.U.M.P.”

- **Opera Singer**
  Sing-spell the words like an opera singer. Sing the whole word at the end.

- **Drum-a-drum-drum**
  Beat your desk like a drum and chant the letters in the word. Say the whole word and beat the syllables.

- **Fly Like a Bird**
  Flap your arms like a bird. Each time you flap, say the letters in the word. Flap quickly when you say the word.

- **Let’s Cheer!**
  Cheer the letters in the word like a cheerleader. Give me an “UH”, “UH”. What does that spell? CHEER IT.

- **Snap and Clap**
  Spell the word aloud. Clap as you say the consonants and snap as you say the vowels.

- **Dribble and Shoot**
  Dribble each letter in the word and shoot when you say the whole word at the end.

**Difficulty recognizing numbers or symbolic signs in math**

- Teacher will present a series of numbers, symbols, or letters with one that is different in the series (rotated, bigger, etc.). Student will pick out the different one.
- Teacher will use enlarged and exaggerated math symbols with titles (add, subtract, etc.)
- Student will be asked to recognize numbers and symbols by touch alone.
- Teacher will create picture representation of each symbol.
- Teacher will provide student with number formation step worksheets.
Difficulty tracking print

- Teacher will enlarge text.
- Student will use a visual tracker (index card, a piece of paper, colored overlay) to keep track of where they are in reading.

Student will use a pointer to demonstrate 1:1 correspondence.

Teachers of students who struggle with 1:1 correspondence will place colored dots beneath words in a text to reinforce 1:1 correspondence.
Difficulty spacing during writing

- Student will use spaceman, popsicle sticks, cheerios or their finger to allow for appropriate spacing between words.

- Teacher will provide special paper choice to reinforce appropriate spacing between words.
# Reading Strategies

<table>
<thead>
<tr>
<th>Learning Difficulty</th>
<th>Intervention</th>
</tr>
</thead>
<tbody>
<tr>
<td>Difficulty Discriminating the differences between two or three sounds</td>
<td>- Students will discriminate between two or three sounds (consonants, long vowels, or short vowels) using word/picture sorts.</td>
</tr>
<tr>
<td></td>
<td>- Students will use CVC flipbooks to practice reading multiple words from the same family.</td>
</tr>
<tr>
<td></td>
<td>- Students will identify the beginning sound of a word using picture clip cards, elkonin boxes, word families and word mats.</td>
</tr>
</tbody>
</table>
| Awareness of rhyme: difficulty producing words that rhyme, difficulty recognizing word families, and/or difficulty blending complex sounds and words in phonics | - Teacher will present two to four words, some of which rhyme at the end. Student will pick out the words that rhyme or do not rhyme.  
- Teacher will create sentences with words that rhyme and students will create a rhyming sentence.  
- Students can match pictures that rhyme, use rhyming word family flip books, or orally match rhyming words to a given word. Students can use plastic eggs to change the initial letter and create word families. |
<table>
<thead>
<tr>
<th>Segmenting words into syllables: difficulty with sequencing sounds into words, difficulty in remembering phonics, poor ability to read words in syllables, difficulty spelling multisyllabic words</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Clapping or tapping syllables: teacher will say words and student will clap or tap the syllables out.</td>
</tr>
<tr>
<td>- Teacher will give student different counters. Student will place a counter on the table for every syllable he/she hears.</td>
</tr>
<tr>
<td>- CVC mats</td>
</tr>
<tr>
<td>- Sorting picture cards by number of syllables</td>
</tr>
<tr>
<td>- Elkonin sound boxes</td>
</tr>
</tbody>
</table>
| Phonemic awareness: difficulty with sound/symbol relationship, difficulty rhyming words, difficulty recognizing words that have different initial or final consonants | - Teacher will present a target sound and ask the student to identify which word has the target sound (in the beginning, middle, or end of the word). One word will contain target sound, one word will not. The student will identify the word that contains the target sound.
- Teachers can use Elkonin sound boxes for identifying individual sounds in words, CVC mats, Go Fish for rhyming words or sight words, rhyming popsicle sticks jar. |
Letter-naming skills: difficulty with sound/symbol association, difficulty decoding words, difficulty developing sight words, difficulty discriminating letters

- Teacher will prepare a sheet consisting of a group of letters. One letter in each group will be different. Student will circle the letter that is different and name the letter.
- Students can circle individual letters on a sheet of multiple letters, or from words in context.

- Teacher will group four of the same letter and one different letter in a row. Student will select which letter is different and name the letter.
- Student will trace letters on cards, sand paper, sand, or shaving cream.
- Student will make letters with different materials such as clay, play dough, or wiki sticks.
- Student will sort various letters into different groups according to size, color and shape. Student will name the letter in each section.
- Students can trace, build, and write sight words, circle them in context, and use them in sentences.

Letter-sound correspondence skills: difficulty segmenting letter-sound activities, difficulty blending phonemes into words, difficulty decoding and encoding words, difficulty reading words in text, difficulty reading and writing sentences or paragraphs

- Segmentation: Teacher will say a word and repeat the same word saying the individual sounds of the letters. Teacher will show the letter that corresponds to the sound. Student will repeat the individual sounds while pointing to the corresponding letters.
- Blending sounds: Teacher will show letters to the student and ask the student to say each individual corresponding sound of the letters presented. The letters shown spell out a word. Student will look at the letters that spell the word and say the sounds quickly.
- Adding letter/sound: Teacher will spell a word. Student and teacher read it together. Teacher will add a letter.
| Fluency: difficulty reading quickly and automatically, difficulty with reading comprehension, difficulty reading with expression, tone, emphasis and word phrasing | Teacher will choose three sight words and write them. Students will practice these words on index cards in sentences and in paragraphs.  
Teacher will sort multiple sounds into word families, controlled words, or spelling generalizations. Examples: -ild, -old, -ind, -ing, -ank, -unk, -onk.  
Teacher will sort multiple sounds word sorts by the different sounds that spelling generalizations make.  
Teacher will illustrate spelling patterns by teaching the different sounds that all the single consonants and short vowels make, as well as the spelling rules for -ck, -tch, and -dge combinations.  
Students will learn the inflectional ending of words by creating a base word plus the following endings: -es, -ed, -ing, -er, -est.  
Teacher will demonstrate that two words can be changed into one with a contraction by taking away a letter and adding an apostrophe.  
Teacher will write the two parts of compound words on two different index cards. Students will sound out each part of the word and then say them together.  
Student will be taught the six types of syllables: closed syllable, open syllable, silent e syllable, double vowel team syllable, controlled r syllable, and consonant le syllable. |
<table>
<thead>
<tr>

</table>
| Characteristics on a character map.  
  ● Student will make a prediction and discuss whether he is right or wrong at the end of the story.  
  ● Student will characterize the story elements by setting, characters, problems, events and resolution.  
  ● Student will sequence the story.  
  ● Student will compare and contrast two concepts within the story.  
  ● Students will fill in a KWL chart.  
  ● Teacher will model and students will practice:  
    ● Summarizing, questioning, clarifying, or predicting.  
    ● Teacher will read a story that contains vivid details. As the story is read, students will be asked to answer the following questions: what does it look like, smell like, feel like, and taste like?  
    ● Teacher will model his/her thinking process by saying their thoughts out loud. Students will practice think-alouds with other students. |
<table>
<thead>
<tr>
<th>Learning Difficulty</th>
<th>Interventions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Content: Difficulty expressing thoughts in writing; avoidance of writing tasks</td>
<td>• Teacher will provide pictures of comic strips and will ask student to write a sentence under each picture.</td>
</tr>
<tr>
<td></td>
<td>• Teacher will have a student read a story and then ask the student questions about the story and have him/her write responses.</td>
</tr>
<tr>
<td></td>
<td>• Teacher will teach brainstorming by selecting a topic and asking student to give ideas.</td>
</tr>
<tr>
<td></td>
<td>• Teacher will show student how to write an outline before writing.</td>
</tr>
<tr>
<td></td>
<td>• Teacher will provide sentence starters.</td>
</tr>
<tr>
<td></td>
<td>• Teacher will have a student write about a topic using all five sentences.</td>
</tr>
<tr>
<td></td>
<td>• Teacher will give student a list of transitional words and phrases to use when connecting details or paragraphs.</td>
</tr>
<tr>
<td></td>
<td>• Student will keep a journal that he/she writes in every day.</td>
</tr>
<tr>
<td></td>
<td>• Use Storyboard to express thoughts and sequence the story.</td>
</tr>
<tr>
<td></td>
<td>• Students will speak their sentences into a recording device and play-back as needed.</td>
</tr>
<tr>
<td></td>
<td>• Students will use visual graphic organizers to help record their ideas. Templates will help students formulate ideas.</td>
</tr>
</tbody>
</table>
Mechanics: Difficulty in spelling, grammar skills, punctuation, capitalization

- Students will engage in interactive writing strategies.
- Interactive writing and shared reading will appropriately address students’ needs.
- Teacher will provide student with an extensive proofreading checklist.
- Recasting- Teachers can implicitly respond to a child with correct grammar and often emphasize the correct word.
- Students can use a sentence frame graphic organizer (teacherspayteachers.com) - it provides color coded columns to sort different parts of speech.

![My Writing Editing Checklist](http://firstgradewow.blogspot.com/2015/01/hows-my-writing.html)

- Teacher will ask students to exchange written work with other students and make necessary corrections.
- Students can do Look, Say, Spell, Cover, Check
• Students will complete assigned activities from SpellingCity App

![Spelling Activities](http://margdteachingposters.weebly.com/spelling-investigations--activities.html)

1. **Spelling Tallies**

In addition to the core curriculum (Tier 1), the following lists other curriculum, interventions and programs currently provided in various, regular and special education classrooms in grades K-5.

Core Curriculum (balanced literacy): a methodology that integrates various components of literacy instruction. The following approaches are used by the classroom teacher to teach reading and writing within a minimum of a ninety minute block: reading aloud, shared reading, guided reading, word study, reading workshop, and independent reading. Writing instruction includes: shared writing, interactive writing, writing workshop and independent writing.

Fundations: Fundations serves as a prevention program to help reduce reading and spelling failure. It is integral to a Multi-tiered System of Supports (MTSS) or Response to Intervention (RTI) framework, providing research-based instruction in Tier 1 as well as early intervention (Tier 2) for students at risk for reading difficulties. To support the implementation of an MTSS or RTI framework, progress monitoring is built into Fundations. This allows students requiring a more intensive program to be identified early before undergoing years of struggle.

Guided Reading: This is a teaching approach designed to help readers build an effective system for processing a variety of increasingly challenging texts over time. The teacher forms temporary groups of students that are alike in their development of a reading process.

Leveled Literacy Intervention: LLI is designed to be used with small groups of children who need intensive support to achieve grade level competencies. LLI serves those children that do not qualify for one-on-one intervention but are still struggling. The goal of the intervention to bring the children to grade level achievement.

Read 180: A research-based program that promotes foundational and comprehension reading skills. The science behind the system’s framework carefully scaffolds reading and foundational activities to ensure that students have the opportunity to strengthen their instructional and independent reading levels.

Reading A to Z: A school-wide or individual subscription is required for the use of the materials provided from this company. It offers teachers, printable teaching materials to teach leveled reading, phonemic awareness, reading comprehension, reading fluency and vocabulary.

Reading Workshop: an organized set of language and literacy experiences (a mini-lesson, individual reading, conferring, and sharing) designed to help students become more effective readers. In the broader sense, reading workshop includes three different kinds of reading; independent reading, guided reading and literature study.

Recipe for Reading: a research based comprehensive, multisensory phonics-based reading program designed for struggling readers.

I Read: The program helps promote foundational success for all K-2 children by providing them with systematic and explicit instruction in foundational reading. Beginning with alphabet knowledge, print concepts, and phonological awareness, the program works towards increasingly complex skills including word recognition, spelling, and fluency.
SIM: The Strategic Instruction Model uses prompting to help struggling students write simple sentences and paragraphs. It consists of two parts; fundamentals and proficiency in sentence writing strategy and support in the development of paragraph writing.

System 44: An intensive research-based program. The program offers foundational instructional approaches to help support students who require intensive reading instruction. The program provides targeted comprehension, foundational, writing, and vocabulary instruction.

Wilson Program: A highly structured, remedial program that directly teaches the structure of the language to students. This program is designed for one-on-one or small groups in grades 2 to adult who have severe difficulty with decoding and encoding (spelling).

Word Study: Learning about words through focused attention to words and word elements, which helps students become independent readers and writers. Word study experiences involve direct attention to words through mini-lessons, independent application of strategies, principles and concepts, exploration and discovery of reading words and sharing of new learning.

Writing Workshop: This effective, research-based structure provides students with the instructional support needed to become effective writers. Writing workshop is an interrelated combination of writing experiences that occur during the writing block of the language/literary framework. It encompasses focused writing, both assigned and self-selected, in a variety of genres and content areas, including research projects.

### Differentiation between Language Differences vs. Language Disability

#### Table 1 Language Areas

<table>
<thead>
<tr>
<th>LANGUAGE AREAS</th>
<th>DIFFERENCE</th>
<th>POSSIBLE DISABILITY/ CONCERNS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pragmatics:</strong> The rules governing social interactions (e.g. turn taking, maintaining topic of conversation.)</td>
<td>Social responses to language are based on cultural background (e.g., comfort level in asking or responding to questions) Pauses between turns or overlaps in conversation are similar to those of peers with the same linguistic and cultural background.</td>
<td>Social use of language or lack thereof is inappropriate (e.g., topic of lesson is rocks and the student continues to discuss events that occurred at home without saying how they relate to rocks.)</td>
</tr>
<tr>
<td><strong>Syntax:</strong> The rules governing the order, grammar, and form of phrases or sentences</td>
<td>Grammatical errors due to native language influences (e.g., student may omit initial verb in a question—<em>You like cake?</em> (omission of <em>Do</em>) Word order in L1 may differ from that of English (e.g., in Arabic, sentences are ordered verb-subject-object while Urdu sentences are ordered subject-object-verb)</td>
<td>Grammatical structures continue to be inappropriate in both languages even after extensive instruction (e.g., student cannot produce the past tense in either Spanish or English indicating difficulty with grammatical tenses)</td>
</tr>
<tr>
<td><strong>Semantics:</strong> The rules pertaining to both the underlying and the surface meaning of phrases and sentences</td>
<td>A student whose native language is Korean may have difficulty using pronouns, as they do not exist in his/her native language. A student may use words from L1 in productions in L2 because of his inability or unfamiliarity of the vocabulary in L2 (e.g., <em>The car is muy rapido.</em>” In this case, the student knows the concept as well as the needed structure but cannot remember the vocabulary)</td>
<td>Student is demonstrating limited phrasing and vocabulary in both languages (e.g., his/her sentences in both languages demonstrate limited or no use of adjectives and adverbs and both languages are marked by a short length of utterance)</td>
</tr>
<tr>
<td><strong>Morphology:</strong> The rules concerning the construction of words from meaningful units</td>
<td>Native speakers of Russian may not use articles as they do not exist in that language. A student whose native language is Spanish may omit the possessive (‘s’) when producing an utterance in English (e.g., <em>“Joe crayon broke”</em> or he will say <em>“the crayon of Joe broke,”</em> applying a structure that is influenced by the rules of his/her L1. He/she still demonstrates understanding of the morphologic structure for possession but is demonstrating errors in structure that</td>
<td>Student’s productions in both languages demonstrate a lack of the possessive form indicating that he/she has not acquired this morphologic structure by the appropriate age. Again, both languages may be marked by a short length of utterance.</td>
</tr>
<tr>
<td>LANGUAGE AREAS</td>
<td>DIFFERENCE</td>
<td>POSSIBLE DISABILITY/ CONCERNS</td>
</tr>
<tr>
<td>---------------</td>
<td>------------</td>
<td>-------------------------------</td>
</tr>
<tr>
<td>Fluency:</td>
<td>Student’s language does exhibit more interruptions, interjections, and/or repetitions for his/her age, but there are no physical concomitants marking the speech (physical strain or repeated physical actions), and the student does not seem to exhibit a consciousness of his/her dysfluency. Students learning L2 may exhibit interruptions, interjections, and repetitions as they are searching for words while speaking.</td>
<td>Major reliance on gestures rather than speech to communicate in both L1 and L2, even after lengthy exposure to English. The student exhibits not only interruptions, interjections, and/or repetitions, but also demonstrates physical concomitants that accompany these behaviors such as facial grimacing, leg stomping, or blinking that indicates physical struggle in producing speech. In addition, these students may demonstrate recognition of their dysfluency and try to avoid specific sounds or words. These behaviors will occur in both languages.)</td>
</tr>
<tr>
<td>Phonology:</td>
<td>Student may omit specific sound combinations or have difficulty producing certain sounds in the L2 that do not exist in the phonology of the L1 (e.g., student may have difficulty producing the /r/ /l/, /f/, /ch/, or /th/ in L2, or a Tagalog speaker might say “past” instead of “fast” or add a vowel before words that begin with clusters (“I go to eschool.”)</td>
<td></td>
</tr>
</tbody>
</table>

Implementing RtI with Limited English Proficient English Language Learners

English Language Learners (ELLs)/Multilingual Learners (MLLs)

ELL/LEP- The term English Language Learners (ELLs) refers to students whose first language is not English, and encompasses both students who are just beginning to learn English (often referred to in federal legislation as "limited English proficient" or "LEP") and those who have already developed considerable proficiency. The term underscores the fact that, in addition to meeting all the academic challenges that face their monolingual peers, these students are mastering another language. (Taken from RESPONSE TO INTERVENTION Guidance for New York State School Districts, October 2010, pp. 30-37)

MLL- The term Multilingual Learners (MLLs) refers to those students who speak more than one language other than English. In this case, English may be the students’ third or fourth language.

Basic Interpersonal Communication Skills (BICS) Versus Cognitive Academic Language Proficiency (CALP)

At times, teachers refer diverse students with learning and behavior problems because they think that limited English proficiency is not an issue. A student may be observed using English on a regular basis and the conclusion is made that language transition is no longer a factor; however, they may be confusing basic interpersonal communication skills (BICS) for cognitive academic language proficiency (CALP). These acronyms are part of language proficiency theory developed by Jim Cummins (1984) that explains the differences between social and academic languages, respectively. BICS is the basic language ability necessary for face-to-face social communication. It includes gestures, visual clues, and expressions, and it relies on situational context. It takes one to two years to achieve age-appropriate levels in BICS. CALP is the language ability necessary for academic achievement in a context-reduced environment such as classroom lectures and textbook reading. It takes five to seven years to achieve age appropriate levels of CALP, with minimal assistance provided.

The New York State Education Department cites considerations when implementing RtI with English Language Learners:

- Teaching is culturally responsive - The student’s prior experiences are considered, including home language background and socio-cultural background.
- Reading Instruction - Teachers should consider the relationship between a student’s language proficiency and his/her literacy skills. Reading fluency and comprehension may be strongly determined by vocabulary and linguistic proficiency of both the first and second language.
- Math Instruction - Linguistic proficiency and vocabulary comprehension are important when understanding math concepts. Several concepts of math are not necessarily universal.
- When designing the school district’s RtI process, literacy and oracy in both home and new languages, culture, and educational history are variables to be considered when assessing and planning instruction for ELLs. In all three tiers, these variables stay consistent.
- ENL is an integral part of core instruction for all LEP/ELL students (Part 154 of the Regulations of the Commissioner of Education).
Matching Instruction to Student Need

Differentiated instruction should be used for ALL students; however, differentiated instruction for ELLs/MLLs should consider the student’s level of English proficiency and prior educational experiences in addressing cultural and linguistic differences.

In determining appropriate instruction/intervention, the following list applies to all levels of ELL/MLL students:

- consider the amount and type of ENL instruction the student received in the past and in the present
- if applicable, consider the amount and type of home language instruction in the past and in the present
- ensure that the language(s) used for intervention matches the language(s) used for core instruction
- consider the impact of language and culture on instruction and learning
- contact the family for guidance and feedback
- ensure that certified ENL teachers serve on the RtI instructional decision-making team

Assessment:

- Home Language Questionnaire- Identifies if a language other than English is spoken at home
- Interview- Assesses the relationship between their two languages
- NYSITELL- Based on the interview results students are identified on their level of proficiency. It will identify the initial placement within ENL.
- NYSESLAT- End of the year assessment to determine next year’s placement. It decides a students’ proficiency level.
- Monitor proficient students who have exited the ENL program based on NYSESLAT scores.
  - Optional exit opportunity- Expanding/commanding in all 4 subcategories and a 3 or 4 on NYS ELA assessment

Mandates:

Accommodations:

ACCOMMODATIONS CHECKLIST FOR ELL STUDENTS

☐ Provide double or triple wait time
☐ Provide oral tests
☐ Use visual aids
☐ Provide additional instructions
☐ Extend time to finish assignments
☐ Shorten assignments
☐ Allow for peer tutoring
☐ Use assignment notebook and prompts
☐ Teach in small groups
☐ Pre-teach key vocabulary
☐ Reduce paper/pencil tasks, and increase hands on tasks
☐ Provide manipulatives, props, and realia
☐ Seat at the front of the class
☐ Help students build a personal picture dictionary
☐ Read to the student
☐ Encourage students to underline key words or important facts
☐ Allow students opportunity to express key concepts in own words and/or home language

[ ] Pair student with more proficient student(s) for mentorship opportunities

[ ] Chunk and scaffold new information to benefit student mastery of material

For additional information please see: [www.centeroninstruction.org](http://www.centeroninstruction.org) – Language and Reading Interventions For English Language Learners and English Language Learners with Disabilities
ENL Tier 2 Instructional Strategies

Increasing Better Story Retelling Behavior after Guided Reading with Tier 2 ELLs/MLLs:

- “Someone...Wanted...But...So...” Strategy
  - The student puts a character(s) name in place of someone, their wish or motivation for wanted, the story problem or obstacle for but, and the resolution for so. For example, in the story, The Little Red Hen: “The Little Red Hen wanted help, but the other animals said no, so she did it herself.” It gives students a structure for talking about the most important parts of a story and keeps their talk within shorter parameters. It also gives you a guide for questioning them further about the parts of the story they did not understand well. Make sure you give them a visual of the words Someone...Wanted...But...So... and have them touch the words as they are retelling each part. When they first begin, aim to get them to speak about the “Someone Wanted,” part, and then add the other two parts later as they gain confidence and ability. This strategy will not work for all books, but it works very well for many.
    - [http://www.heinemann.com/shared/companionResources/E05661/3-7_SomebodyWantedButSoThen.pdf](http://www.heinemann.com/shared/companionResources/E05661/3-7_SomebodyWantedButSoThen.pdf)
    - [http://www.heinemann.com/shared/companionResources/E05661/2-6_SentenceStartersSupportNoticingsWonderings.pdf](http://www.heinemann.com/shared/companionResources/E05661/2-6_SentenceStartersSupportNoticingsWonderings.pdf) * This link gives students sentence starters to support noticings and wonderings about text.

Increasing Oral Language and Class Participation of Tier 2 Students:

- Acting/Performing
  - Acting out stories is a powerful way to get Entering and Emerging ELLs/MLLs involved. It helps them to match a physical action to a vocabulary word. If they are part of a small dramatic retelling group, they could watch others act out the story and then copy them. This works well with all reading levels. For Level A books, show students a simple motion or action for the verb on each page. For example, I can swing, I can jump, I can slide, etc. As students watch they can try and guess the page or pages that are being acted out. For Levels D and above, there is a narrative that can be acted out. If students have trouble with this, choose or create a repeated line from the text and have the ENL student “chant” the repeated line when needed, while the others in the group act out the story.

Shared Reading and Writing:

- Kinesthetic instructional practices
  - A kinesthetic component is very important for ELLs/MLLs, especially those at the lower levels. When you are executing a shared writing or shared reading activity, one very powerful strategy is to have students “Stop and Sketch” instead of “Stop and Jot.” This lends itself especially well to nonfiction text, but can also be used for fiction. Teach them to “Sketch like a scientist,” meaning that they do quick pencil sketches without too much detail. Once they learn this, you can provide stoppage time after a paragraph or two of shared reading. Have them sketch important learning. Later, they will TOUCH the sketch with their hand and SAY what they learned.
Improving the Connection between Speaking and Writing for Tier 2 ELLs/MLLs:

- **Sentence frames**
  - Sentence frames help students learn patterns of academic language and academic writing. Even at the lower reading levels, books are written in a way that students do not speak. Therefore, sentence frames are utilized to facilitate student understanding.
  - ![Sentence frames link](http://www.heinemann.com/shared/companionResources/E05661/3-10_ScaffoldingToolboxOfSentenceFrames.pdf)
  - ***This link is great because it gives you sentence frames for all of the five pillars of reading comprehension (Description, cause and effect, problem/solution, sequence, compare and contrast, and establishing arguments). Each comprehension strategy needs to be taught explicitly, especially to ELLs/MLLs.*

Content-based Instruction:

- Acting out and stop and sketch are also very powerful strategies for science and social studies vocabulary. In a science unit choose 5-8 key vocabulary words that lend themselves to being displayed (i.e. migrate, hibernate, hunt, etc.) and have students work in groups to act out the words. It is important to prompt students to sketch what they performed and to talk to each other about their acting decisions.
  - ![Content-based instruction link](http://www.heinemann.com/shared/companionResources/E05661/3-2_WritingLikeAScientist.pdf)
  - ![Content-based instruction link](http://www.heinemann.com/shared/companionResources/E05661/1-4_PassportTemplate.pdf)

Increasing Understanding of Book Structure for Tier 2 ELLs/MLLs:

- **Wall Story**
  - A wall story aims to teach the importance of retelling events from a story in sequential order. Students make pictures of different events from the story and physically move the pages around to create the correct sequence. If you have used an anchor book for shared reading with the class, break the story into sections and have students work in small groups to create an illustration that shows a specific part of the book.

**Useful Links:**

- ![Capstoneinteractive.com](http://www.heinemann.com/shared/companionResources/E05661/3-5_MyNotes.pdf)
  - Capstone is a great resource because it reads books aloud to students. It is especially useful for ELLs/MLLs who are reading on a level alone and have difficulty participating in a large group.

  - www.Colorincolorado.org (Strategies and Tips):
➢ Five Things Teachers Can Do to Improve Learning for ELLs in the New Year:
   - This article describes specific and measurable goals for increasing language production, teaching vocabulary, building on background knowledge, and increasing writing opportunities.

➢ www.eduplace.com/graphicorganizer/
   - *This site also translates the organizers with one click. The Spanish organizers can be given to parents at a parent teacher conferences to give them ideas for having their child talk to them about books they read at home.

➢ www.everythingesl.net/inservices/graphic_organizers.php

➢ Visual Thinking Strategies for Improved Comprehension:
   - This article gives an example of a lesson in picture description and eliciting talk about pictures and illustrations.

➢ The following Links are free pdfs from the book, Core Instructional Routines, K-5, by Andrea Honigsfeld and Judy Dodge. There are many printable pdf links from this book following the ideas and strategies described above. There are many additional easily printable guides for building background knowledge, reading routines, nonfiction text structures, writing, speaking and listening routines. Many of them help the teacher by providing sentence starters, questions starters, and writing frames for different levels of ELLs/MLLs.

ENL Instructional Behaviors

- Allow extended time for all assessments and wait-time
- Work toward longer passages as skills in English increase
- Introduce key vocabulary before lesson
- Provide a copy of overhead notes for students
- Use visuals
- Write key/guiding words on board
- Provide highlighted text and/or key concepts for visual guidance throughout the lesson
- Divide and assign novels into smaller chapters-- “literary goals” and reading response post-its
- Teacher reads aloud daily, giving ELL/MLL a student-copy for highlighting/notes/drawings
- Provide small group instructional activities for reinforcement
- Check for comprehension often, 10 minute intervals, non-verbal cues (thumbs up, down, sideways)
- Draw ENL students gradually into class discussions
- Allow students to preview more difficult concepts/material when appropriate (i.e. A picture associated with the concept, allowing the student to brainstorm what he/she may learn about in the upcoming lesson, provide students a word-list associated with the lesson)
- Audio version of the text
• Encourage the student to “take chances” with language: this will allow him/her to become more comfortable speaking and sharing what he/she knows.
• Use small-group and partner talk as often as possible
• Allow ENL students to draw pictures when their words are not available.
• Partner low proficient student with more proficient student to provide linguistic model and mutual learning opportunities
• Use writing and conferring opportunities to promote goal setting and reflection
• Body language is a fantastic tool to promote student enthusiasm and confidence

- Student goals and linguistic abilities should reflect an “approaching”, “experimenting” and “implementing” development of those curricular goals as demonstrated by Teachers College Reading and Writing Workshop models, varying by individual student proficiency and ability.
Use of RtI in the Determination of a Learning Disability

New York State has established criteria for the CSE to use when determining if a student has a learning disability. These criteria include consideration of data and instructional information obtained through an RtI process. This provides important information in determining if a student needs to be referred for an individual evaluation and whether the student has a learning disability. Effective July 1, 2012, a school district must have an RtI process in place as it may no longer use the severe discrepancy between achievement and intellectual ability to determine that a student in kindergarten through grade four has a learning disability in the area of reading.

In determining of eligibility for special education, the CSE must conclude that underachievement of the student is not due to lack of appropriate instruction in reading (including the five essential components), mathematics or limited English proficiency. The data from RtI can help to document that the reason for a student’s poor performance or underachievement is not due to lack of appropriate instruction or limited English proficiency. Along with other individual evaluation information, RtI data can yield important descriptive information about how children learn and why they may be having difficulties.

When determining if a student has a learning disability, the data from multiple sources indicates that the student, when provided appropriate instruction:

1. does not adequately achieve grade level standards in the areas of reading and/or mathematics;
2. (a) is not making sufficient progress toward meeting those standards when provided with appropriate instruction consistent with an RtI model;
   or
   (b) exhibits a pattern of strengths and weaknesses in performance and/or achievement relative to age or grade level standards as found relevant by the CSE;
3. has learning difficulties that are not primarily the result of a visual, hearing or motor disability; mental retardation; emotional disturbance; cultural factors; environmental or economic disadvantage; or limited English proficiency.

Process for Determining Learning Disability Using RtI Data

While the data collected through an RtI process may be used as part of a student’s individual evaluation to determine if a student has a learning disability, it may not be the sole source of information to make this determination. A student suspected of having a learning disability must receive a comprehensive multidisciplinary evaluation.

The student-centered data collected and information on instructional strategies used throughout an RtI process provides important information to inform the CSE about the student’s progress to meet age or State-approved grade-level standards. This data should include, but not be limited to:

- data that demonstrates that the student was provided appropriate instruction delivered by qualified personnel including research-based instruction in reading;
- progress monitoring data that describes how a student responded to particular interventions of increasing intensity;
- instructional information on a student’s skill level and rate of learning relative to age/grade level standards or criterion-referenced benchmarks; and
- Evaluative data including CBM regarding a student’s performance that is useful and instructionally relevant.

The district will use the NYS model form for documentation of a learning disability eligibility determination.
NYSED recommends that all schools, including nonpublic schools, implement RtI programs. If a student from a nonpublic school is referred for a CSE evaluation and there is no data from an RtI process available because the nonpublic school does not implement RtI, information from other sources should be obtained regarding the type of instruction the student has received and the student’s progress in the school’s curriculum (such as teacher reports, classroom tests, standardized tests, report cards and information from parents.) Nonpublic school students cannot be denied an evaluation to determine if the student has a disability or the provision of services, if eligible, based on the nonpublic school not implementing an RtI process and the lack of data available from an RtI process.

**Written Report**

The CSE must prepare a written report documenting the eligibility determination of a student suspected of having a learning disability which must include the basis for how the decision was made, and if the student has participated in an RtI process. This report should include:

- the instructional strategies used;
- the student-centered data collected; and
- documentation that parents were notified when the student required an intervention beyond that provided to all students in the general education classroom, informing them about the amount and nature of student performance data that would be collected, the general education services that would be provided in the RtI program, and strategies that would be used for increasing their child’s rate of learning and the parents right to refer their child for special education services.

The determination of eligibility is based upon a comprehensive multidisciplinary evaluation consistent with section 200.4(b) of the Regulations of the Commissioner of Education. The parent and CSE may agree to extend the timeline to complete the individual evaluation in order to have the student participate in a process to assess the student’s response to scientific, research-based intervention (RtI).

**Quality Indicators for Use of RtI Data in a Learning Disability Determination**

- The determination of a student with a learning disability is based upon a comprehensive multidisciplinary evaluation.
- Data based on the student’s response to scientific-based intervention is used as part of the individual evaluation information to determine if a student has a learning disability.
- The CSE considers progress monitoring data that describes how a student responded to particular interventions of increasing intensity.
- Student’s skill level and rate of learning relative to age/grade level standards or criterion-referenced benchmarks are considered.
- Instructionally relevant evaluative data including curriculum-based measures regarding a student’s performance is considered.
- Student information from the RtI process provides data-based documentation on whether the student has made sufficient progress to meet age or State-approved grade-level standards in the area of the suspected disability.
- Teacher(s) providing RtI interventions participate in the CSE meeting to determine a student’s eligibility for special education.
Assessment Tools

1. Universal Screening utilizes Curriculum Based Measures (CBMs)

Screening is an assessment procedure characterized by brief, efficient, repeatable testing of age-appropriate academic skills (e.g., identifying letters of the alphabet or reading a list of high frequency words) or behaviors. Screenings are conducted for the purposes of initially identifying students who are “at-risk” for academic failure and who may require closer monitoring and/or further assessment.

Screenings of all students should be conducted three times per academic year (Fall, Winter, and Spring) to help ensure the early identification of students potentially at risk and the areas in which they may experience difficulty.

2. Progress Monitoring

Progress monitoring is the practice of assessing student performance using CBMs and other standardized measures on a repeated basis to determine how well a student is responding to instruction. Progress monitoring occurs for students in Tier II and III.

If the progress monitoring indicates that the student has achieved the skill (data points approaching, at/or above the trend line), the intervention will be discontinued. The student’s progress will be monitored while in the classroom to confirm that the skill is maintained.

If the data gathered through progress monitoring indicates the skill is improving but not achieved, the intervention will be maintained. If the data gathered through progress monitoring indicates that the rate of improvement is not approaching the trend line to meet the level of the student’s peers, the intervention will be altered. It can be altered by changing the focus of the intervention, increasing frequency, increasing time of sessions, or changing the materials used for the intervention.

3. Supplemental Data

Use of informal and formal grade assessments (e.g. benchmark assessments, writing samples, observations etc...) during the course of instruction can provide teachers with additional information on which to base instructional decisions.
Staff Development Plan

This chart is designed to maximize the effectiveness of RtI in the Glen Cove School District. Staff development was phased in, focusing on the mandated needs of grades K-5 beginning in Spring 2012. This is an ongoing process as the RtI model is phased in. Some staff development will need to be continued to support newly hired teachers. Long term substitute teachers as well as permanent substitute teachers will also be considered in this plan.

In addition to the RtI rollout plan, ongoing professional development for our core Balanced Literacy Programs already in place is critical for the success of our students. This will be coordinated by building principals, in conjunction with other administrators, to meet the needs of their respective staffs. This professional development may include, but not be limited to, guided reading, Teachers College Reading Writing Project (TCRWP), Fundations, inter-visitations, dialogue between faculties, purchase of necessary programs, and the use of district substitutes.

## Inventory of Interventions

*(Please indicate the interventions used: “S” Successful, “U” Unsuccessful, “NA” Not Applicable)*

### Classroom Management

1. Used verbal and nonverbal cuing to ensure the student is attending to task
2. Provided preferential seating: a) near teacher b) near board or c) paired with another student
3. Rewarded student for improvement as well as consistent work habits
4. Had student monitor and check his/her behavior
5. Assisted the student with organization of locker, books, papers, homework, etc.
6. Used “Wh” and “How” questions to focus attention
7. Developed and used a contract system with a student
8. Developed a behavior modification system: a) including positive reinforcement b) providing immediate feedback about academic and/or social functioning and c) providing consequences for inappropriate behavior

### Instruction

9. Provided modeling of tasks
10. Provided small group instructions
11. Used cooperative teaching techniques
12. Used a multisensory approach
13. Gave additional time to complete assignments
14. Allowed student to make up work and/or tests
15. Repeated or rephrased directions
16. Had the student repeat directions in his/her own words
17. Allowed student to record answers directly on tests, not on separate answer sheets
18. Provided a word bank for oral and written assignments
19. Used highlighters to emphasize important phrases and key concepts
20. Used highlighters to emphasize important directions on tests and assignments
21. Provided study sheets with page numbers and/or subtitles showing where the information was obtained
22. Had student keep a vocabulary notebook
23. Taught and provided mnemonic devices and/or smaller time fragments
24. Reduced the amount of information on the page
25. Modified the content of test: a) fewer spelling words b) Open book or c) testing one concept
26. Modified the content of assignments: a) fewer spelling words b) odd number of math problems or c) one paragraph instead of two
27. Provided graph paper for math computational problems to align columns
28. Used a tape recorder to record reading material, or provided books on tape/CD
29. Allowed students with fine motor difficulties to use pencils and/or print instead of cursive
30. Used sorting activities, copying patterns, pegboards, color-coded paper, etc. to aid visual-perceptual-organizational skills
31. Assigned a buddy to work with the student to provide a) a role model b) help with assignments and organization c) provide carbon copies of homework and notes and d) packing book bag

### Communication

32. Conferenced with staff for a consistent approach for academic and behavioral needs
33. Contacted the student’s home and informed parent about the student’s difficulties
34. Suggested to the student and/or parents that they set a time and place for the child’s work at home
35. Had a parent conference with teacher(s), counselor(s) and/or administrator(s)
36. Had a) daily b) weekly or c) monthly communication with the parent(s)
37. Provided daily reports signed by parent(s) and teacher(s) to monitor student’s progress
38. Suggested student attend any after school support program

### Student Information:

#### Student Strengths (please check all boxes that apply)

- Positive attitude
- Hard worker
- Works well in groups
- Works well independently
- Motivated
- Organized
- Cooperative
- Responsible
- Creative
- Has leadership qualities
- Athletic
- Musically/Artistically Talented
- Other: _________

(Please explain)

### Academic Concerns (please check all boxes that apply)

- Slow rate of work
- Difficulty in following directions
- Incomplete assignments
- Doesn’t work well in groups
- Doesn’t work well independently
- Sight words
- Decoding
- Reading fluency
- Reading comprehension (literal)
- Reading comprehension (inferential)
- Writing mechanics
- Written expression
- Organization of writing
- Algebraic Thinking
- Number sense
- Operations
- Computational fluency
- Fact Memorization
- Single Step Word Problems
- Multi Step Word Problems
- Place Value
- Poor listening
- Retention rate
- Other: _____________

(Please explain)
How many times per week do you meet with this student in small group settings?

What materials are you using for small group instruction?

What/How are you assessing student growth in small group instruction?

How many minutes is student spending on Dreambox?

**Academic Interventions Previously Attempted:** (please check all boxes that apply)
- [ ] Small group instruction
- [ ] Reduced assignment length
- [ ] Computer-based interventions: __________
- [ ] Current pull-out academic support: __________
- [ ] Extra help
- [ ] Additional time to complete tasks
- [ ] Differentiated materials
- [ ] Simplified directions
- [ ] Additional examples provided
- [ ] Visual cues/checklists
- [ ] Preferential seating
- [ ] Refocus/redirection
- [ ] Medical intervention (i.e. vision, hearing, etc.): __________
- [ ] Other not listed: __________________________

(Please Explain)

When would be the best day(s)/times for someone to **observe** the student having difficulties that you describe above?

Please indicate what related information/data you are including with this referral. The meeting will be scheduled only when this form is completed and information/data is submitted.

- [ ] STAR Renaissance
- [ ] Read 180
- [ ] LLI
- [ ] Fountas & Pinnell
- [ ] Anecdotal notes
- [ ] Samples of student work in area(s) of concern
- [ ] NYSITELL/NYSESLAT
- [ ] Other __________________________

**Behavioral Concerns** (please check all boxes that apply)

**Inattentive**
- [ ] Difficulty paying attention
- [ ] Difficulty sustaining alertness
- [ ] Difficulty maintaining effort
- [ ] Becomes distracted by extraneous stimuli
- [ ] Fails to listen to instructions
- [ ] Fails to attend lessons

**Impulsive**
- [ ] Blurs out answers
- [ ] Interrupts others
- [ ] Interferes in others’ conversations
- [ ] Fails to wait turn
- [ ] Makes noises at inappropriate times

**Overactive**
- [ ] Fidgets
- [ ] Jumps out of seat
- [ ] Walks around classroom inappropriately
- [ ] Sits/stands on desk; climbs on furniture
- [ ] Destroys property

**Withdrawn**
- [ ] Stares blankly/daydreams
- [ ] Appears sullen or detached
- [ ] Puts head down on desk/table
- [ ] Hides
- [ ] Doesn’t participate in group work

**Uncooperative**
- [ ] Refuses to follow directions
- [ ] Argues/talks back
- [ ] Defiant body language
- [ ] Refuses to take turns
- [ ] Elopess/attempt to elope
- [ ] Refuses to share
- [ ] Pouts
- [ ] Refuses to respond/answer

**Other Behaviors Not Listed:** __________________________ (Please Explain)

- [ ] Anxious
  - Pulls hair
  - Bites nails
  - Twitches
  - Paces
  - Shakes/trembles
  - Taps hands/feet repetitively
  - Cries
  - Tense/worried expressions
  - Complains of stomach ache/pains
  - Difficulty catching breath
  - Squeezes/grabs face or hands
  - Chewing on clothing

- [ ] Aggressive
  - Hits/slaps others
  - Kicks others
  - Pinches/scratches others
  - Bites others
  - Throws objects in class
  - Threatens/bullies others
  - Spits
  - Breaks/defaces property
  - Pushes others
  - Screams/yells

- [ ] Social/Emotional
  - Swears/uses inappropriate language
  - Tattles on others unnecessarily
  - Talks too loudly
  - Others trying to work
  - Talks nonsense
  - Touches self inappropriately
  - Touches others inappropriately
  - Injures self
  - Soils self
  - Removes clothing
  - Cheats
  - Steals
Where/When do behaviors occur?

- Specific time of day; please indicate: _____________________________________________________
- Specific subject being taught; please indicate: _____________________________________________
- Specific location; please indicate: ______________________________________________________

Behavior Interventions Previously Attempted: (please check all boxes that apply)

- Classroom-wide management plan
- Refocusing
- Redirection
- Preferential seating
- Flexible seating
- Positive reinforcement
- Tangible incentives
- Classroom behavior intervention plan
- Repeating directions
- Verbal warnings
- Calls home
- Parent/guardian conference; Date: ___________
- Other: __________________________

(Please explain)

Consultation With Support Staff: (please check all boxes that apply)

- Social Worker; date/reason: ___________________________________________________________
- Psychologist; date/reason: ____________________________________________________________
- Behaviorist; date/reason: _____________________________________________________________
- Nurse; date/reason: _________________________________________________________________
- Principal; date/reason: ______________________________________________________________

Dear (Parent/Legal Guardian):

Glen Cove City Schools frequently screens all students and reviews their records to look at their progress compared to their grade-level peers and statewide standards. We believe in supporting students to ensure they are successful on their grade level.

In order to provide the best education for all children, we believe we need to start with an effective, research-based education for each child. In Glen Cove, we have a two tiered approach with different levels of support additional to their regular curriculum. Our Response to Intervention (RtI) plan uses a problem-solving process to look over students’ progress and needs. We then look at how to best deliver instruction that matches the needs of your child with the intervention that works for them. Your child’s response to these interventions are then assessed and monitored for progress.

As a result of the district screening and/or record review, your child ____________has been referred to the RtI team. The team concluded that your child requires (Tier III) interventions in the area of Reading. These (Tier III) interventions take place in small groups. This instruction is in addition to the instructions provided to all students. The interventions will be provided by (Mr./Ms.)_________________________. Your child’s progress will be monitored for a minimum of six weeks and adjustments may be made in the intervention plan.

Parents have the right to request an evaluation for special education programs and/or services. However, in order to classify a student as having a learning disability through special education, there must be data regarding the student’s response to the scientifically-based RtI strategies. Referrals made by parents of students that have not been recipients of such RtI interventions may be required to meet with the building principal within 10 days of receipt of the written referral request. The principal and parent will determine whether the student would benefit from additional general education support as an alternative to special education.

If you have any questions, please feel free to contact the building Principal.

Sincerely,

(Principal’s Name)

On behalf of the IST/RtI team

By signing below, I acknowledge receipt of the letter indicating that my child will receive reading services for the current school year.

Student Name ___________________________ Classroom Number ___________________________

Parent/Guardian Signature ________________________ Date _________________________
Estimado (padre / madre / tutor legal):

Glen Cove City Schools evalúa con frecuencia a todos los estudiantes y revisa sus registros para ver su progreso en comparación con sus compañeros de nivel de grado y los estándares estatales. Creemos en apoyar a los estudiantes para garantizar que tengan éxito en su nivel de grado.

Para proporcionar la mejor educación para todos los niños, creemos que debemos comenzar con una educación efectiva basada en la investigación para cada niño. En Glen Cove, tenemos un enfoque de dos niveles con diferentes niveles de apoyo que se suma a su plan de estudios regular. Nuestro plan de Respuesta a la Intervención (RtI) utiliza un proceso de resolución de problemas para revisar el progreso y las necesidades de los estudiantes. Luego, observamos la mejor manera de impartir instrucción que coincida con las necesidades de su hijo con la intervención que funcione para ellos. La respuesta de su hijo a estas intervenciones luego se evalúa y se monitorea para ver el progreso.

Como resultado de la evaluación del distrito y / o la revisión de registros, su hijo ______________ ha sido remitido al equipo de RtI. El equipo concluyó que su hijo requiere (Nivel III) intervenciones en el área de Lectura. Estas intervenciones se diseñarán para enfocarse en el área de ______________. Estas intervenciones (Nivel III) se llevan a cabo en un grupo pequeño durante _____ minutos por semana. Esta instrucción es adicional a las instrucciones proporcionadas a todos los estudiantes. Las intervenciones serán proporcionadas por (Mr./Mrs./Miss )_______________. Un Equipo de Apoyo de Instrucción hará un seguimiento del progreso de su hijo por un mínimo de seis semanas y puede hacer ajustes en el plan de intervención.

Los padres tienen el derecho de solicitar una evaluación para programas y / o servicios de educación especial. Sin embargo, para clasificar a un estudiante como que tiene una discapacidad de aprendizaje a través de la educación especial, debe haber datos con respecto a la respuesta del estudiante a las estrategias de RtI con base científica. Es posible que se requiera que las referencias hechas por los padres de los estudiantes que no han recibido tales intervenciones de RtI se reúnan con el director de la escuela, dentro de los 10 días posteriores a la recepción de la solicitud de referencia por escrito. El director y el padre determinarán si el estudiante se beneficiaría de un apoyo de educación general adicional como alternativa a la educación especial.

Si tiene alguna pregunta, no dude en ponerse en contacto con el director del edificio.

Atentamente,

(Nombre del director)

En nombre del equipo IST / RtI

-------------------------------------------------------------------------------------------------

Al firmar a continuación, acuso recibo de la carta que indica que mi hijo recibirá servicios de intervención académica para el próximo año escolar.

Appendix F.a: Parent Notification Letter for AIS Reading/Math

Glen Cove School District

Dear Parent/Guardian,

Your child, _________________________ is eligible to receive Academics Intervention Services (AIS) in the following subjects:

___________ English Language Arts (ELA)
___________ Mathematics

School districts are required to provide Academic Intervention Services for identified students in need of support to help them reach the new learning standards. Multiple measures are considered including teacher recommendation, results of the New York State English Language Arts or New York State Mathematics Assessment Tests, district created exams and classroom performance.

Please sign the form below and return to your child’s teacher on or before September XXXX.

Sincerely,

XXXXXXXX
Principal

By signing below, I am acknowledging receipt of the letter indicating that my child will receive Academic Intervention Services for the current school year.

Estimado Padre / Tutor,

Su hijo, _________________________, es elegible para recibir Servicios de Intervención Académica (AIS) en la/las siguientes asignaturas:

__________ Artes de Lenguaje en Inglés (ELA)

__________ Matemáticas

Los distritos escolares deben proporcionar servicios de intervención académica para los estudiantes identificados que necesitan ayuda para ayudar a que ellos alcancen los nuevos estándares de aprendizaje. Se consideran múltiples medidas incluyendo la recomendación del maestro, resultados de las Artes de Lengua Inglesa del Estado de Nueva York o las Pruebas de Evaluación de Matemáticas del Estado de Nueva York, exámenes creados por el distrito y desempeño en el aula.

Por favor firme el formulario a continuación y devuélvalo a la maestra de su hijo en o antes de Septiembre. XXXX.

Atentamente,

XXXXXXXX
Director

Al firmar a continuación, es Su hijo, _________________________, es elegible para recibir Servicios de Intervención Académica para este año escolar.

Committee of Special Education

DOCUMENTATION OF THE DETERMINATION OF ELIGIBILITY FOR A STUDENT SUSPECTED OF HAVING A LEARNING DISABILITY

Section 200.4(j)(5) of the Regulations of the Commissioner of Education requires that the committee on special education (CSE) prepare a written report of the determination of eligibility of a student suspected of having a learning disability that contains a statement of the following information:

1. The CSE has reviewed the individual evaluation results for ________________, which indicates that the student:
   - [ ] has a learning disability requiring special education services.
   - [ ] does not have a learning disability.

2. This decision was based on the following sources, including aptitude and achievement tests, parent input, and teacher recommendations, as well as information about the student’s physical condition, social or cultural background, and adaptive behavior in accordance with section 200.4(c)(1) of the Regulations:

3. The relevant behavior noted during the observation of the student and the relationship of that behavior to the student’s academic functioning indicate:

4. The educationally relevant medical findings, if any, indicate:

5. To ensure that underachievement in a student suspected of having a learning disability is not due to lack of appropriate instruction in reading or mathematics, the CSE must, as part of the evaluation procedures pursuant to section 200.4(b) and (c), consider:
   - [ ] Data that demonstrate that prior to, or as part of, the referral process, the student was provided appropriate instruction in regular education settings, delivered by qualified personnel.
   - [ ] AND
   - [ ] Data-based documentation of repeated assessments of achievement at reasonable intervals, reflecting formal assessment of student progress during instruction, which was provided to the student's parents.
6. The CSE has determined, consistent with section 200.4(j)(3) of the Regulations, that:

➢ The student does not achieve adequately for the student’s age or to meet State-approved grade-level standards in one or more of the following areas: oral expression, listening comprehension, written expression, basic reading skills, reading fluency skills, reading comprehension, mathematical calculation, mathematics problem solving;

AND

➢ The student either does not make sufficient progress to meet age or State-approved grade-level standards in one or more of the areas identified in this paragraph when using a process based on the student’s response to scientific, research-based intervention pursuant to section 100.2(ii);

OR

➢ Exhibits a pattern of strengths and weaknesses in performance, achievement, or both, relative to age, State-approved grade level standards or intellectual development that is determined by the CSE to be relevant to the identification of a learning disability, using appropriate assessments consistent with section 200.4(b).

AND

➢ The student’s learning difficulties are not primarily the result of a visual, hearing or motor disability; mental retardation; emotional disturbance; cultural factors; environmental or economic disadvantage; or limited English proficiency.

7. Complete this item if the student has participated in a process that assesses the student’s response to scientific, research-based intervention.

➢ The following instructional strategies were used and student-centered data was collected:

AND

➢ Document how parents were notified about the amount and nature of student performance data that will be collected and the general education services that will be provided; strategies for increasing the student’s rate of learning; and the parents’ right to request an evaluation for special education programs and/or services.
CSE Member Certification of the Determination of a Learning Disability:

The determination of eligibility for special education for a student suspected of having a learning disability must be made by the CSE, which must include the student’s regular education teacher and a person qualified to conduct individual diagnostic examinations of students (such as a school psychologist, teacher of speech and language disabilities, speech/language pathologist or reading teacher). Each CSE member must certify in writing whether the report reflects his or her conclusion. If not, the member must submit a separate statement presenting his or her conclusions.

**Appendix H: Glossary of Terms**

**Response to Intervention**

RtI is a school-wide, multi-tiered, data-driven framework that allows teachers to assist any child identified as needing academic and/or behavioral support. RtI is used for any student whether they are working below grade level or are gifted and not meeting their full potential.

**Glossary of Terms**

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Data Management System (yet to be determined by GC)</td>
<td>A data management system facilitates the organization of student, classroom, school, and district level benchmark and progress monitoring data which automatically graphs data against student, classroom, school, district or national norms or targets.</td>
</tr>
<tr>
<td>Assessment</td>
<td>Assessment is the process of measuring and documenting what students have learned.</td>
</tr>
<tr>
<td>Benchmark tests</td>
<td>A benchmark test is a short assessments (can be as short as 2-3 minutes) given at the beginning, middle, and end of year to establish baseline achievement data and progress which are administered every 4-6 weeks.</td>
</tr>
<tr>
<td>Curriculum-Based Measurement (CBM)</td>
<td>A CBM is a method of monitoring student progress through a curriculum. Uses short, formative assessments that are comprised of observation, summaries, on-going assessments and reviews that provide instructional feedback for the teacher to administer with the student.</td>
</tr>
<tr>
<td>Data-Based Decision Making</td>
<td>Data-Based Decision Making is the process of planning for student success (academic and behavioral) through the use of ongoing progress monitoring and analysis of data.</td>
</tr>
<tr>
<td>Differentiated Instruction</td>
<td>Differentiated Instruction is a method of instruction that matches the specific strengths and needs of each learner.</td>
</tr>
<tr>
<td><strong>Fidelity</strong></td>
<td>Fidelity is the implementation of a program, system or intervention exactly as designed so that it is aligned with research and ensures the largest possible positive outcome.</td>
</tr>
<tr>
<td><strong>Frequency</strong></td>
<td>Frequency is the number of times a child receives an intervention in a given time frame (e.g., daily, twice weekly.)</td>
</tr>
<tr>
<td><strong>Gap Analysis</strong></td>
<td>Gap Analysis is a tool for measuring the difference between the student’s current level of performance and benchmark expectations.</td>
</tr>
<tr>
<td><strong>Intensity</strong></td>
<td>Intensity is the length of time during which a child receives an intervention (e.g., 30 minutes.)</td>
</tr>
<tr>
<td><strong>Interventions</strong></td>
<td>Interventions are instructional strategies and curricular components used to enhance student learning.</td>
</tr>
<tr>
<td><strong>Positive Behavior Support</strong></td>
<td>Positive Behavior Support is the proactive school-wide approach for teaching and improving socially acceptable behavior.</td>
</tr>
<tr>
<td><strong>Problem Solving Team</strong></td>
<td>A Problem Solving Team is a collaborative team that meets to evaluate student data, plan interventions and monitor student progress.</td>
</tr>
<tr>
<td><strong>Progress monitoring</strong></td>
<td>Progress monitoring is used to frequently check data for student progress towards success. Most often, progress monitoring data comes from short (2-3 minute), normed assessment probes given every 1-4 weeks.</td>
</tr>
<tr>
<td><strong>Multi-tiered intervention model</strong></td>
<td>The Multi-tiered intervention model is a continuum of instruction, where each tier provides increasingly intense interventions and levels of support in addition to previously provided instruction.</td>
</tr>
</tbody>
</table>
| **Research-Based Interventions** | Research-Based Interventions are instructional strategies and curricular components that have been validated as effective by experimental design studies that:  
a) have been applied to a large study sample,  
b) show a direct correlation between the intervention and student progress, and  
c) have been reported in peer-reviewed journals. |
Frequently Asked Questions

1. **What is “Response to Intervention”?**
Response to Intervention is a school-wide, multi-tiered, data-driven framework that allows teachers to assist any child identified as needing academic and/or behavioral support. RtI is used for any student whether they are working below grade level or are gifted and not meeting their full potential.

2. **How do students move between Tiers?**
Moving between tiers is a fluid process and there will likely be some fluctuation for many students whether they exhibit academic and/or behavioral concerns. Essentially, students move between tiers based on the gap demonstrated through progress monitoring as well as with the intensity level of the intervention.

3. **What is a Problem Solving Team?**
A Problem Solving Team is a group of teachers and school staff who meet regularly to evaluate student data, plan interventions and monitor student progress. Different staff members may be part of the team depending on the needs of the student.

4. **What is an intervention?**
An intervention is an instructional strategy or curricular component used to enhance student learning. Interventions are systematic and targeted in the area of identified need and designed to improve student performance toward a measurable goal.

5. **How do I know my student is progressing?**
Response to Intervention uses short, frequent tests (about 1-3 minutes each) to find out whether a student is making progress. The results are often displayed using a graph. The graph will provide valuable information about student progress and how he or she is performing in relation to a standard benchmark.

6. **Is a student ever involved in more than one intervention at a time?**
Students should typically participate in one intervention at a time for individual skill deficits. However, in some situations a student may be participating in a standard protocol intervention such as a flexible reading group to address reading skills in general, but may also be in a more intense (Tier III) intervention to address the specific skill deficit. Additionally, a student may participate in more than one intervention if there are a variety of skill deficits in different academic or behavior areas.

7. **How will parents be involved in supporting the learning needs of their children?**
Parents will be encouraged to communicate with teachers and school staff who are providing instructional support to the student in order to review the student’s progress. Additionally, parents should read with their child on a consistent basis and/or engage in other activities that promote positive growth in skills.
They should:
1. Model an example of how fluent reading sounds
2. Ask the child probing questions about the book and connect the events to his/her life
3. Help the child go back to the text to support his/her answers
4. Discuss the meaning of unknown words, both those he/she reads and those he/she hears
5. Use environment and technology to build the child’s phonemic skills

In the case where the parent is not English proficient, reading to a child in their native language is equally important.

Glen Cove School District

Shared Consensus
Entrance to AIS/Reading Program Form

As per the Glen Cove RTI District Plan, students receive TIER 3 services based upon conversations with the building principal, AIS / reading teachers, and classroom teacher, resulting in a shared consensus that the student requires TIER 3 interventions in order to fully access the curriculum. Conversations focus on data that points to students requiring intensive services to meet the appropriate benchmarks set by the district and New York State.

Student Name_________________________________ Grade_______ Date______________

❖ List all parties present and responsible for the shared consensus decision.
❖ Please sign to acknowledge the approval of the decision that has been made by the above mentioned personnel within the RTI Plan.
